SHERLOCK SYSTEMS UNVEILS NEW MEDIA PLAYER

The SherPlayer SSI-DH57JG is the latest release in Sherlock's line of media players for the digital signage market

Buffalo Grove, IL Nov. 10, 2010 - Sherlock Systems, Inc., has announced today the release of another digital signage media player. The SherPlayer SSI-DH57JG is a small, low cost, yet graphically robust digital signage media engine.

There's no need to sacrifice performance with a small system. The tiny, yet powerful SSI-DH57JG offers the power of a traditional desktop unit. This compact design has an integrated HDMI port for 1080p output support and ten-channel Intel® High Definition Audio with Dolby Home Theater. The SSI-DH57JG supports the latest in Intel i3 and i5 processors in the LGA 1156 socket

The SherPlayer SSI-DH57JG features include: Compatible with Intel Pentium, Core i3 & i5 Processors, Intel H57 Express Chipset, Intel HD graphics (HDMI and DVI-I outputs) offering 1080p video playback, DDR3 SDRAM 1333MHz/1066MHz memory, 6 USB ports, 1 RS232 port, 1 eSATA port, wireless LAN option, TV tuner option, and more. .

Sherlock Systems' offers a wide variety of SherPlayers to fit most digital signage solutions. SherPlayers are small enough (7 3/8" d x 2 5/8" h x 8 3/8" w) to install behind large format screens, yet powerful enough to run many of the existing CMS software offerings. We offer pre-configured media players, but what sets Sherlock Systems apart is they can build a customized media player to fit your needs including chassis designs.

In addition to building media players, Sherlock Systems also offers a complete line on displays, mounts, CMS software, and accessories to complete your digital signage solution. They also offer evaluation units and trials of some of their software offerings to help get you started.

Resellers Welcome. For additional information and reseller pricing contact Sherlock Systems, Inc at 1-800-942-2120 or sales@sherlocksystems.com. Sherlock Systems, Inc. main website is www.sherlocksystems.com/media-players
